

# Environmental policy

We want to do our bit.

## Environmental Policy

Everyone working within the agricultural sector knows that there is only one planet on which we can cultivate the land on. We are fully aware of this and therefore strive to do our bit by working actively with environmental goals. We believe that the impact of environmental initiatives benefits the climate, which in turn creates sustainability in the country side — something we all depend on.

### Continuous Improvement

We aim, both in our operational and strategic work, to identify opportunities to reduce energy consumption, greenhouse gas emissions, and waste.

We are certified according to KRAV and comply with applicable environmental objectives and work processes. Being KRAV-certified means that we contribute to a more sustainable food supply chain.

- ✓ We actively work to optimize transportation from Swedish farms to end customers in order to reduce emissions. As a positive outcome, this also leads to more cost-efficient transport solutions.
- ✓ Through our business system, we maintain full traceability down to farm level for all deliveries.
- ✓ Transport companies that use biofuels, such as RME, shall be given preference for deliveries to selected customers.
- ✓ We strive to become more digitalized and thereby reduce the use of office materials.
- ✓ We sort our waste and send paper for recycling.
- ✓ We increase the proportion of digital meetings to reduce travel.
- ✓ We use only renewable electricity at our office
- ✓ We carefully consider the environmental impact of our business decisions, both in the short and long term.
- ✓ We will comply with all applicable environmental legislation, as well as relevant laws, regulations, and directives.

Our environmental work shall be communicated openly both internally and externally. We welcome customers and suppliers who share our view. We continuously monitor and evaluate the environmental performance of our customers and suppliers.

Finally, environmental management is of strategic importance to BM Agri. This policy has been established to help us achieve our environmental objectives in a simple and efficient manner. Our environmental efforts also strengthen our market position, supporting our overall business goals.
